**Digital Maker**

...We make makers

## What do Digital Maker CIC Do?

Digital Maker CIC was founded in 2017 to provide high quality STEAM (Science, Technology, Engineering, Art, Mathematics) for people aged 9 years +. in Scotland.

We run engaging project based workshops with hands on practical making at the heart of our education and training, using low cost, affordable electronics, computing equipment and materials.

Physical computing and digital making provide life long skills such as creative & critical thinking, resilience, empowerment and communication. We know it, because we see it in our workshops.

Computing | making | team work | robotics | challenges | electronics | confidence

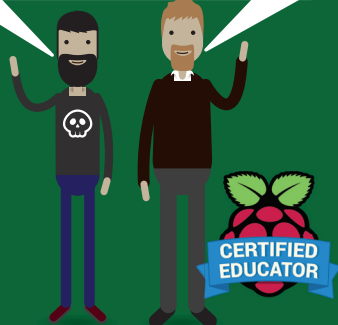

- Primary & Secondary Education
- Further Education
- STEM CPD / CLPL
- Employability Training Courses

**Fun, creative & challenging project based activities for 9yrs+**

**STE[A]M**
